

Environmental Policy

Westcrowns Contracting Services Limited recognises that its day to day activities and operations impact on our environment. We acknowledge our responsibility and commitment to minimise this impact by fully complying with environmental legislation and furthermore we undertake that:

We will promote sound and proven environmental policies and practices at all levels and in each department of our business.

We will increase awareness of environmental responsibilities amongst our staff and operatives by a process of continual education.

We will minimise waste and pollution caused by our operations by developing and effecting sound waste management procedures.

We will reduce water consumption by the use, where feasible, of recycled water for processing.

We will reduce the consumption of non-replaceable fuels and by strategic planning and development incorporate energy efficient measures into our business.

We will promote an environmentally friendly purchasing policy by striving to deal with supply chain partners who share our policies.

We will, where practical, avoid the use of environmentally damaging materials and processes.

We will work with other agencies as appropriate to promote environmental activities.

Environmental Statement

It is Westcrowns Contracting Services Ltd's intention through assistance with their clients to minimise the environmental affect imposed by the installation of Pilkington Profilit glass screens. This is summarised as follows;

Materials

Westcrowns Contracting Services Ltd can advise their clients upon materials which are Recyclable or Bio Degradable. Over and above this Westcrowns Contracting Services where reasonably practicable will use the most environmentally efficient sundry products.

Waste

Westcrowns Contracting Services Ltd, where reasonably possible, will install the specified Pilkington Profilit screens with the minimum amount of waste. Identifying recyclable and general waste products to the contractor, thus preventing excess materials disposed of at landfill sites.

Water

Due to the nature of the products we install we use minimal amounts of water to clean our glass and are constantly reviewing our products and those in the market place to ensure that our water usage is further reduced.

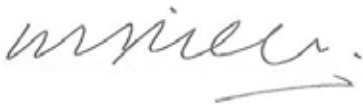

Transport

Where reasonably possible, Westcrowns Contracting Services Ltd, will in conjunction with our clients organise all our materials to be delivered in one delivery to reduce our CO2 emissions. When our operatives travel to site they will use the minimum amount of vehicles i.e crew bus or car pool. All efforts to minimise CO2 emissions and fuel consumption will be taken.

Environmentally Sensitive Areas

Where ever Westcrowns Contracting Services Ltd are working in environmentally sensitive areas we will seek guidance from the main contractor and follow their guidelines. If no guidelines exist or in the opinion of Westcrowns Contracting Services Ltd the guidelines do not go far enough then Westcrowns Contracting Services Ltd will propose our own guidelines after consultation with the main contractor to minimise any potential risk to the area.
